

Xm provides a quality service, like cable or satellite television. I love that I can receive the kinds of channels I get on xm that my local radio does not provide; especially new groups I would never hear on public broadcasting. Lets face it I pay for a service that takes money away from people that really do not listen to what the consumer wants, xm listened to me when I suggested to have a punk rock channel which they now have. NAB should not violate others rights and like most greedy associations should just accept their defeat. XM IS THE BEST SERVICE I HAVE EVER PAID FOR, AND THEY LISTEN TO WHAT THEIR CUSTOMERS WANT. Besides public broadcasting can not even begin to reach the area xm serves and if there were something to be notified about xm is able to reach the people. GO XM
